

WHITE TIGERS ARE SPECIAL TIGERS THAT ARE BORN WITH WHITE FUR. WHITE FUR IS A VERY RARE GENETIC MUTATION IT OCCURRED IN THE WILD POSSIBLY IN AS FEW AS 1 IN 10000 WILD TIGER'S BIRTH.

THERE ARE ONLY 200 WHITE TIGERS LEFT IN THE WILD ACCORDING TO THE (ITWS).

HUMANITY HAS A COLLECTIVE RESPONSIBILITY TO CARE FOR WHITE TIGERS

SO IT'S UP TO ALL OF US TO STOP SUPPORTING THE CRUELTY INVOLVED IN DISPLAYING THIS MYTHICAL NON-EXISTENT SPECIES THE WHITE TIGERS BEING DUMPED AFTER THEY ARE NO LONGER.

CAPTIVE INBREEDING OF WHITE TIGERS RESULTS IN HIGH NEONATAL MORTALITY RATES, TYPICALLY EXCEEDING 80%.

THIS WHITE TIGER MANIA IS ALSO A BIG REASON WHY WE HAVE MORE ORANGE TIGERS IN CAGES IN THE US TODAY THAN TIGERS LEFT ROAMING IN THE WILD.
